

BND-ONE-TIR-MED

Wireless temperature sensor offers a means of safely screening at building entry points.

This sensor system can be mounted at gates, foyers, lobbies or other entry points, allowing employees and visitors to self-screen prior to entering the building. This allows safe physical distancing from screeners, security, reception employees. The operation is simple as the subject stands in front of sensor to start the measurement process.

- Easily visible LED indication of OK or High Temperature
- Wireless transmission of results immediately sent to monitoring computer
- Maintains safe distance from the tester
- Multiple sensors can be tied to one monitoring station
- Relay Output option
- Works with or without central monitoring
- Adjustable thresholds
- Logging of all temperature events, ambient and subject temperature
- Measures automatically, results in 1 to 4 secs.

- Complies with ASTM standard Section 5.3., Designation E1965 - 98(2009)
- FCC, CE, Giteki certified
